

Parallel

Find and Share Parking

THE WORLD'S FIRST SPOT-SHARING PLATFORM

Our free app allows drivers to share their street parking spots instantly and efficiently. In the meantime, they connect with neighbors, help local businesses, and foster community.

HOW IT WORKS

Using our free map-based platform, simply drop a pin of parking spot you currently occupy and indicate the time you plan to leave. Other users can see this spot on a map, let you know they would like to take it when you leave, and coordinate from there.

OUR MISSION

At Parallel, our mission is to make parking easier and more efficient for everyone. Our goal is to reduce the time, stress, and environmental impact it takes to find a spot. As we create a more sustainable and connected world, our platform will transform parking from a hassle into an opportunity to connect and build community.

OUR PLAN

We are live with our Minimum Viable Product on Main Streets across Long Island. As we work to go live in other locations, we are also building new and expanded features. We will be live across the country, with hundreds of thousands of users, by the end of 2024.
